OBJECTIVE

React Developer with hands-on experience in identifying web-based user interactions along with designing & implementing responsive user interface components by deploying React concepts. Proficient in translating designs & wireframes into highquality code, and writing application interface code via JavaScript and ReactJS workflows. Adopt monitoring & maintaining frontend performance and troubleshooting & debugging the same to bolster overall performance.

PROJECTS

- **Bite Buddy** ([link](#)) [\(GitHub\)](#)
Built Bite Buddy, a Swiggy Clone, using React.js to replicate the primary functionalities of the Swiggy food delivery platform, providing users with an intuitive and seamless food ordering experience. Utilized Redux Toolkit for state management. The CORS extension is necessary for data visibility on the screen.
- **YouTube Clone** ([link](#)) [\(GitHub\)](#)
Developed a YouTube Clone using React.js, replicating the core features and functionalities of YouTube to enable seamless user interaction with video content. Utilized Redux Toolkit for state management. The project requires the CORS extension for data visibility on the screen.
- **StreamFlix** ([link](#)) [\(GitHub\)](#)
StreamFlix is a Netflix Clone built with React.js and Firebase, featuring user authentication (sign-up, sign-in, sign-out). Fetch API is used for efficient data retrieval and dynamic updates. Utilized Redux Toolkit for state management
